

The Nautical Institute Impact Report 2024

As a global not-for-profit membership organisation and maritime authority, we are committed to supporting seafarers, enhancing safety, and upholding the highest standards in training, certification, publications, and professional development.

In 2024, our Certification and Accreditation initiatives reinforced professional competency through CPD and refresher courses, ensuring top-quality training. Research and projects, including *The Navigator* and the EU-funded OCEAN Project have driven innovation in navigational safety and operational effectiveness.

Our partnerships with key organisations, such as the IMO, IALA, WMO, industry charities and other NGOs, continue to shape global maritime policy. We are dedicated to growing our membership, supporting future professionals, and strengthening our global network.

We thank our members, partners, and collaborators for their support and look forward to continued progress.

Supporting Seafarers Through Education

51

Scholarships awarded across: Command Diploma Scheme, Leadership & Management Course, Navigating Psychological Safety Course

522

candidates trained

Excellent 4.5/5 satisfaction rate

New training courses on alternative fuels, leadership and AI in incident investigation.

10

Technical webinars and 2 author interviews

7,000

Registrants and 3,500 attendees

Industry Projects and Collaborations

100,000

Circulation of *The Navigator* (triannual) – funded by IFAN and Nautical Affiliates

OCEAN Project:

7

Free training videos

7.5k+

Views since June 2024

18+

Universities and organisations are using the videos for their training purposes (project co-funded by the EU)

EU-ASEAN Sustainable Connectivity Package – EU and Philippines to team up to boost seafarers' training, certification and labour conditions

Industry Leadership and Advocacy

Permanent IMO Representation reinstated with our expert member delegates supporting our permanent technical advisors

Leading discussions on DP Training, simulator use, navigation safety & autonomous ships

Collaboration with the World Meteorological Organisation to deliver the WMO-IMO Symposium on extreme weather

MARS programme continues to identify industry-wide safety lessons

Training and certification

83

Accredited training centres

New CPD and refresher course requirements introduced

38

training centre audits in 2024

5,500+

DP Offshore & DPVM certifications issued in 2024

Global Presence and Community Growth

13,373

members globally with 4,731 students

656

Free online courses for our members

70+

Younger Member Ambassadors (YMAAs) representing students and cadets globally

60

Branches

3,500+

attendees in our technical webinars

Branches and Accredited training centres

Publications and Knowledge Sharing

4

new books

Publication of the free "Training Standards for Handling Alternative Fuels in the Maritime Sector"

14,500

print and digital circulation of *Seaways* magazine (monthly)
